

Saber

Metal Working Machinery

We are looking for wholesale dealers and distributors

Saber is a line of sheet metal, fabricating, metal working, and machining equipment that offers higher quality at a very competitive price.

We maintain a large stocking inventory and stock at our facility conveniently located in Spokane, Washington. This offers the advantage of prompt and inexpensive shipping to all locations throughout the Pacific Northwest. Your customers will appreciate the fast service available when receiving their *Saber* machinery from Spokane and the lower freight costs will help you make those sales!

From sheet metal brakes and shears, to pipe benders, milling machines, lathes and CNC equipment, the *Saber* line is based around the common support equipment in demand by general fabricating shops, maintenance applications, schools, and manufacturing facilities.

Why settle for re-sale discount margins of 5% to 15% when you can be making upwards of 20% on much of the *Saber* equipment we offer. Stocking dealers can qualify for even larger re-sell discounts on many items.

Saber machinery and equipment is fully covered with a ONE year parts warranty standard within the metal working equipment industry.

To become a *Saber* dealer or for additional information, please contact;
